**TEST LABORATORY INFORMATION FOR
LARGE STORAGE WATER HEATERS**

To: Testing Laboratories that Test Large Storage Water Heaters
Manufacturers of Large Storage Water Heaters

Re: Annual Test Laboratory Application Process

Approval of Test Laboratories

Section 1603(a) of the Appliance Efficiency Regulations requires that large storage water heaters be tested at a laboratory that the Executive Director of the Commission determines:

- (1) has conducted tests using the applicable test method within the previous 12 months;
- (2) agrees to and does interpret and apply the applicable test methods set forth in Section 1604 of the *Appliance Efficiency Regulations* precisely as written;
- (3) has, and keeps properly calibrated and maintained, all equipment, material, and facilities necessary to apply the applicable test method precisely as written;
- (4) agrees to and does maintain copies of all test reports, and provides any such report to the Executive Director on request, for all basic models that are still in commercial production; and
- (5) agrees to and does allow the Executive Director to witness any test of such an appliance on request, up to once per calendar year for each basic model.

Applying for Approval

If you would like the Executive Director to determine that your laboratory meets the criteria in Section 1603(a)(1)-(5), and to approve your laboratory for such testing through December 31, 2009, please complete the enclosed application.

The application may be filled out on-line or printed out and completed off-line. In either case, sign and scan the signed application and all appropriate documents and attach them to an e-mail addressed to: appliances@energy.state.ca.us. If you choose this form of submittal, please indicate "2009 LS Water Heater Lab App: <Company Name>" in the subject line, where Company Name is YOUR COMPANY NAME. Alternatively, you may return the original signed application to the address shown below. We are unable to accept applications submitted by FAX. Be sure to include your signed application with all appropriate items attached and send to:

Test Methods

The water heater test methods set forth in Section 1604(f)(2) are as follows:

Large Water Heaters. The test method for large water heaters is ANSI Z21.10.3-1998, modified as follows:

- A. For all products, the duration of the standby loss test shall be until whichever of the following occurs first after you begin to measure the fuel and/or electric consumption: (1) The first cutout after 24 hours or (2) 48 hours, if the water heater is not in the heating mode at that time.
- B. For oil and gas products, the standby loss in Btu per hour must be calculated as follows: $SL \text{ (Btu per hour)} = S \text{ (\% per hour)} \times 8.25 \text{ (Btu/gal-F)} \times \text{Measured Volume (gal)} \times 70(^{\circ}\text{F})$.
- C. For oil-fired products, apply the following in conducting the thermal efficiency and standby loss tests:
 - (1) Venting Requirements—Connect a vertical length of flue pipe to the flue gas outlet of sufficient height so as to meet the minimum draft specified by the manufacturer.
 - (2) Oil Supply—Adjust the burner rate so that: (a) The hourly Btu input rate lies within ± 2 percent of the manufacturer's specified input rate, (b) the CO₂ reading shows the value specified by the manufacturer, (c) smoke in the flue does not exceed No. 1 smoke as measured by the procedure in ASTM-D-2156-80, and (d) fuel pump pressure lies within ± 10 percent of manufacturer's specifications.

D. For electric products, apply the following in conducting the standby loss test:

- (1) Assume that the thermal efficiency (Et) of electric water heaters with immersed heating elements is 98 percent.
- (2) Maintain the electrical supply voltage to within ± 5 percent of the center of the voltage range specified on the water heater nameplate.
- (3) If the set up includes multiple adjustable thermostats, set the highest one first to yield a maximum water temperature in the specified range as measured by the topmost tank thermocouple. Then set the lower thermostat(s) to yield a maximum mean tank temperature within the specified range.

Dual-Fuel Models. Water heaters intended for use either with natural gas or LPG may be tested with natural gas and the results applied to both fuel types. [Section 1604(f)(3)]

Provision of Test Report

Section 1606(a)(3)(C) requires manufacturers of large storage water heaters to submit test reports upon which the manufacturer relies in filing certification information.

Marking

Section 1607(b) requires that the manufacturer's name or brand name or trademark, model number, and date of manufacture, indicating (i) year and (ii) month or smaller (e.g. week) increment, be permanently, legibly, and conspicuously displayed on an accessible place on each unit. Section 1607(d) contains further federal marking requirements that apply to water heaters. Test reports must note whether the marking requirements have been met.

Submittal of Information (Certification) by Manufacturers

The submittal and approval of a test laboratory application does NOT affect the manufacturers' listings of appliance models in our database. Manufacturers of models accurately listed in the database do not need to resubmit any information. However, if information about those models has changed, or if you have manufactured new models that are not yet in the database, you must submit new certification data.

Manufacturers wishing to verify the status of currently listed models may review their listing at the following link:

<http://www.energy.ca.gov/appliances/database/>.

If your model listing is not current, or you need additional certification forms and instructions, they can be found at:

<http://www.energy.ca.gov/appliances/forms/>.

A copy of the Energy Commission's *Appliance Efficiency Regulations* can be found at:
<http://www.energy.ca.gov/appliances/>.

The attached laboratory application may also be obtained at:
<http://www.energy.ca.gov/appliances/forms/>.

The Energy Commission is aware of statements in marketing literature stating or implying Commission approval of products or services. The Energy Commission does not endorse, favor, or recommend any particular product or service. Moreover, California law states that "It is unlawful for any person, firm, corporation, or association that is a nongovernmental entity to . . . solicit the purchase of or payment for a product or service . . . by means of a mailing, electronic message, or Internet Web site that contains a seal, insignia, trade or brand name, or any other term or symbol that reasonably could be interpreted or construed as implying any state or local government connection, approval, or endorsement," with exceptions not relevant here. (California Business & Professions Code section 17533.6.)

If you receive more than one copy of this letter (or similar letters), you are on multiple appliance mailing lists. It is not necessary to apply for the same test method more than once per calendar year. However, you must indicate all appliances that you wish to test with that test method at the time of your original application. If you have any questions you may contact appliance program staff at the address above or by email at:
appliances@energy.state.ca.us.

Sincerely,

Appliance Efficiency Program

Enclosures: 2009 Large Storage Water Heater Test Laboratory Application

PLEASE DO NOT INCLUDE A COPY OF THIS COVER LETTER WITH YOUR APPLICATION

California Appliance Efficiency Program
2009 Test Laboratory Application for Large Storage Water Heaters

Note: Your Completed Sample Test Report(s) must be included with this application.

This is a PDF fillable form. You may complete it on line or print it out and complete it off line. After it has been signed, you may scan and return it as an e-mail attachment to appliances@energy.state.ca.us, or return it via mail to:

Type(s):

_____ states:
Name of Laboratory _____

[Initial all appropriate paragraphs]

_____ I hereby apply for approval of the laboratory stated above for testing large storage water heaters for compliance with the California *Appliance Efficiency Regulations*.

_____ During the period for which approval is granted, our laboratory agrees to comply with all of the provisions (listed below), Sections 1603(a), and 1604(a), of Title 20 of the California Code of Regulations. The test laboratory:

_____ has conducted tests using the applicable test method specified immediately below* within the previous 12 months;

_____ ANSI/ASTM F2022-00 _____ ANSI Z21.10.3-1998 (modified)

_____ agrees to and does interpret and apply the applicable test method set forth in Section 1604 precisely as written;

_____ has, and keeps properly calibrated and maintained, all equipment, material, and facilities necessary to apply the applicable test method precisely as written;

_____ agrees to and does maintain copies of all test reports, and provides any such report to the Executive Director on request, for all basic models that are still in commercial production; and

_____ agrees to and does allow the Executive Director to witness any test of such an appliance on request, up to once per calendar year for each basic model.

_____ Test reports issued to clients shall include statements of compliance or non-compliance of the minimum performance provisions shown in Section 1605.1(f), and the marking provisions in Section 1607.

_____ I have attached to this application an example of a completed sample test report for a large storage water heater tested to the test method(s) initialed above* by this laboratory within 12 months prior to the date of this application, to demonstrate what and how information is provided.

* NOTE: This application may be used for applying to test to ANSI/ASTM F2022-00, and ANSI Z21.10.3-1998 as modified by Section 1604(f)(2) of Title 20. **A separate test report must be submitted for each test method you are applying to be certified for. You may submit one or two (1 or 2) test reports with this application, one for each test method. Your application will only be considered for approval for those test method(s) for which you have submitted a test report.**

I declare under penalty of perjury of the laws of the State of California, that:

All the information in this statement is true, complete, accurate, and in compliance with all applicable provisions of Sections 1601 – 1608 of Title 20 of the California Code of Regulations; and

I am authorized to make this declaration, and to file this application, on behalf of

Name of Laboratory

Signature:_____ Date:_____

Typed Name and Title:_____

SPACE BELOW THIS LINE FOR CALIFORNIA ENERGY COMMISSION USE ONLY

The laboratory identified above is hereby approved for testing large storage water heaters to the referenced test methods:

_____ ANSI/ASTM F2022-00 _____ ANSI Z21.10.3-1998 (modified)

for compliance with the requirements of the *Appliance Efficiency Regulations* from the date shown until December 31, 2009.

Date

BETTY CHRISMAN, Program Manager
Appliance Efficiency Compliance Program
for the Executive Director
